HakuSwap as an innovative automated market maker (AMM) — a decentralized finance (DeFi) application that allows users to exchange tokens, providing liquidity via farming/staking and earning fees in return.

Our Gaming DAPP will have Zero Fees and Zero House advantages as it will only have Player vs Player game modes where players get to play and bet against each other!

We have an upcoming Play to Earn Multiplayer Minigame where Players compete to win $HAKU. We also plan an Android and iOS Haku-Ryu App for Mass Marketing and an easy way to earn $Haku-Ryu!

Haku-Ryu will will have a unique collection of limited edition NFTs of 200 items. This project and game is inspired by Spirited Away and is not affiliated with them in any way.

•Staking• Earn returns the smartest way by staking and farming. Which will be invested in the best DeFi platforms (like AAVE, Compound etc) and earn bonus– boosting profits further.

•Rewards• Get rewarded for holding Haku-Ryu, the native HakuSwap token. We have expertly designed our contract to bring rewards to all our token holders.

•Decentralized• Users are incentivized with the APY governance token which will allow holders to vote on the protocol, access DeFi services and earn extra rewards.
