#What is BullFlagg (BFL)

BullFlag is a BEP20 token that features an auto buyback and burn functionality that utilizes the true burn mechanism of 2% of every transaction and removes it from the supply.

#Tokenomics

BFL encompasses a 1% Development, 2% True Burn, 2% Buyback and a 4% Marketing

#BFL Supply

100,000,000 BFL initial supply at launch preceding verified burns and supply reductions.

#Development Team

The incumbent team have successfully launched prior projects such as DogeVillage (<https://coinmarketcap.com/currencies/dogevillage>) and Elon's Currency (<https://coinmarketcap.com/currencies/elons-currency>).

The project team has obtained a KYC certificate from Cyberscope (<https://github.com/cyberscope-io/kyc/blob/main/1-bfl/kyc.png>) and has had the contract successfully audited (<https://github.com/cyberscope-io/audits/blob/main/1-bfl/audit.pdf>)

Theme color

Provide a theme color in HEX code (for example: #2ac27a). The color will appear in the Telegram Price Bot images: <https://t.me/coinrankingofficialbot>.

Thanks for your submission!

We do our best to list it as soon as possible, usually within 2 working days.

Please be aware that your coin must be tradable on an exchange we've integrated, in order to be added to Coinranking. (Otherwise we can't determine a price.)

So check our list with exchanges first: <https://coinranking.com/exchanges>

Note that we won't process forms with incorrect or incomplete information.
