NOMINATION PROGRAM

Every year, crypto assets grow in size and popularity, requiring greater security and assurance. With the DIFX Nomination Program, your hard-earned digital assets can now be passed on to your relatives and loved ones.

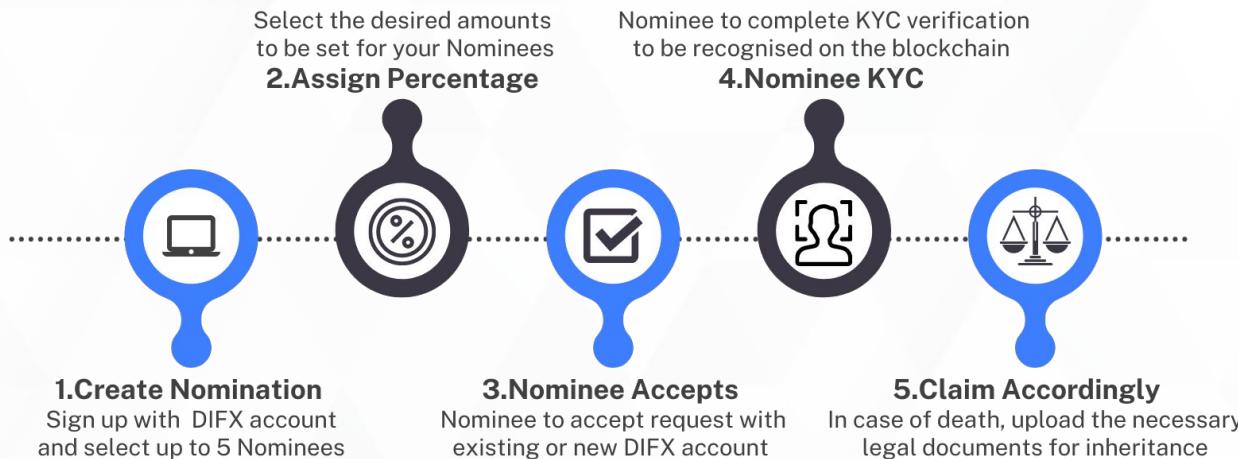

***We are all in this together, and it's not an act of charity.
Without transparency, there is no safety.***

JOURNEY

NOMINATION JOURNEY

NOMINATION PROGRAM PROCESS

- Create nomination
 - ▷ The user puts in a request to create a nomination. The nominator can select single or multiple nominees. The first nominee is free, the rest need to pay in DIFX tokens.
- Nominator
 - ▷ Once the request is processed, they can add their nominees and select the percentage assigned to each nominee out of 100% for all their digital assets.
- Add Nominee
 - ▷ Once the Nominee has been added, the system will notify via email, they will have to create their own account first and upload their KYC. If the user already has an account with us, they will not have to go through this process again.
- Nominee Request
 - ▷ To become a nominee, they will have to accept the nominator's request without knowing the percentage allocation. In case of a declined response, the nominator will be notified.

CLAIM PROCESS

- In order to file a claim, the nominee will have to upload certain documents along with some additional certificates-
 - ▷ Death Certificate of Nominator
 - ▷ Nomination Documents (either Probate, Letters of Administration, Succession certificate, Legal and Heirship certificate, Affidavit for Collection or Small Estate Affidavit)
 - ▷ Relationship documents
- During the document review and acceptance process:
 - ▷ The compliance officer will review the documents and accept or reject the documents, any disapproved documents beneficiary needs to send again via email.
 - ▷ Required Documents can be differ based on the region or govt laws, compliance officers can ask directly to the beneficiary via email for certain documents before approving claims.
 - ▷ Once documents will be approved, the claim will be approved and funds will be transferred to the nominee as per the allocated percentage by the nominator.

MT5: A TOP NOTCH PLATFORM FOR SMART TRADING

- Cutting-edge cross asset trading platform that offers the best user experience.
- Economic Calendar provides information about the macroeconomic events that help investors in decision-making and risk mitigation.
- Provides advanced tools for fundamental analysis, copy trade, and custom indicators facilitated by trading robots.
- Simplifies their investment process and gain profits.
- Available on Android, iOS and Web.

ALGO TRADING

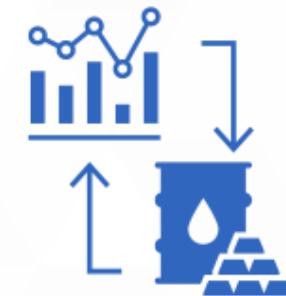

- Using DIFX's algorithmic trading software, clients can automate trading strategies in cryptocurrency, forex, stocks, and derivatives. A method of executing orders that uses automated preprogrammed instructions to consider multiple variables is known as algorithmic trading.
 - ▷ Create your own trading robot
 - ▷ Traders are welcome to trade with their robot.
 - ▷ The benefits of trading robots can be enjoyed to the fullest, regardless of whether you have programming experience or not.
 - ▷ DIFX offers the opportunity to create your own algorithm and trade based upon your strategies in addition to the Expert Advisor development environment.
 - ▷ Trading Strategy Tester.
 - ▷ Test and optimize your trading robot before you use it for real trading.
 - ▷ Graphical display of test results.
 - ▷ One of the most notable features of Strategy Tester is the display of Expert Advisor test results.

CROSS-ASSET TRADING

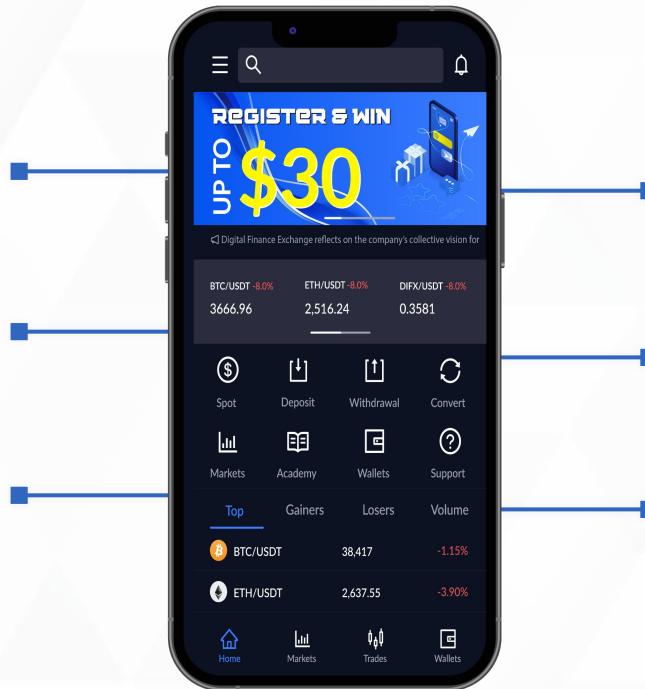

- DIFX is built with blockchain technology, which brings distributed ledger capabilities to the DIFX platform such as trust, security, scalability, and transparency.
- It facilitates the customers with a unique and simple cost platform to trade with various cryptocurrencies as well as other assets.
- DIFX happens to be one of the advanced and finest assets for the cryptocurrency world, making cryptocurrencies more accessible.
- A few examples of these pairs are: Bitcoin vs. Gold, Ethereum vs. Silver, Bitcoin vs. LiteCoin, Bitcoin vs. Ethereum, Additionally, crypto to stocks pairs are also available including brands like Ethereum vs. Tesla, Bitcoin vs. Amazon, Ripple vs. Facebook, It also includes crypto to several indexes, making it one of a kind platform providing such a variety of trading pairs.

MOBILE WALLET

- Zero transfer fees across all assets and platforms
- Manage portfolio for all platforms
- Fully insured mobile wallet available on App Store/Google Play

- One-stop application to manage all assets
- Buy Cryptocurrency using Visa/Mastercard or bank transfers
- Send and Receive multiple coins or tokens

INSURED WALLETS

- DIFX has implemented Fireblocks' flexible policy engine and automated authorization workflows, using them to automatically authorize transactions when they meet defined parameters.
- These tools dramatically sped up transaction times and lowered the need for manual approvals.
- To achieve a strong ROI as quickly as possible, DIFX prioritized operational efficiency from day one.
- We looked for a platform where DIFX could automate operational processes while also strengthening security. At the same time, DIFX wanted faster signing and settlement times to keep a lid on Ethereum fees and meet the expectations of his high-volume, high-asset clients.

INVESTMENT OPPORTUNITIES

If you are an investor looking for a passive income with high profits, DIFX token is the right choice for you.

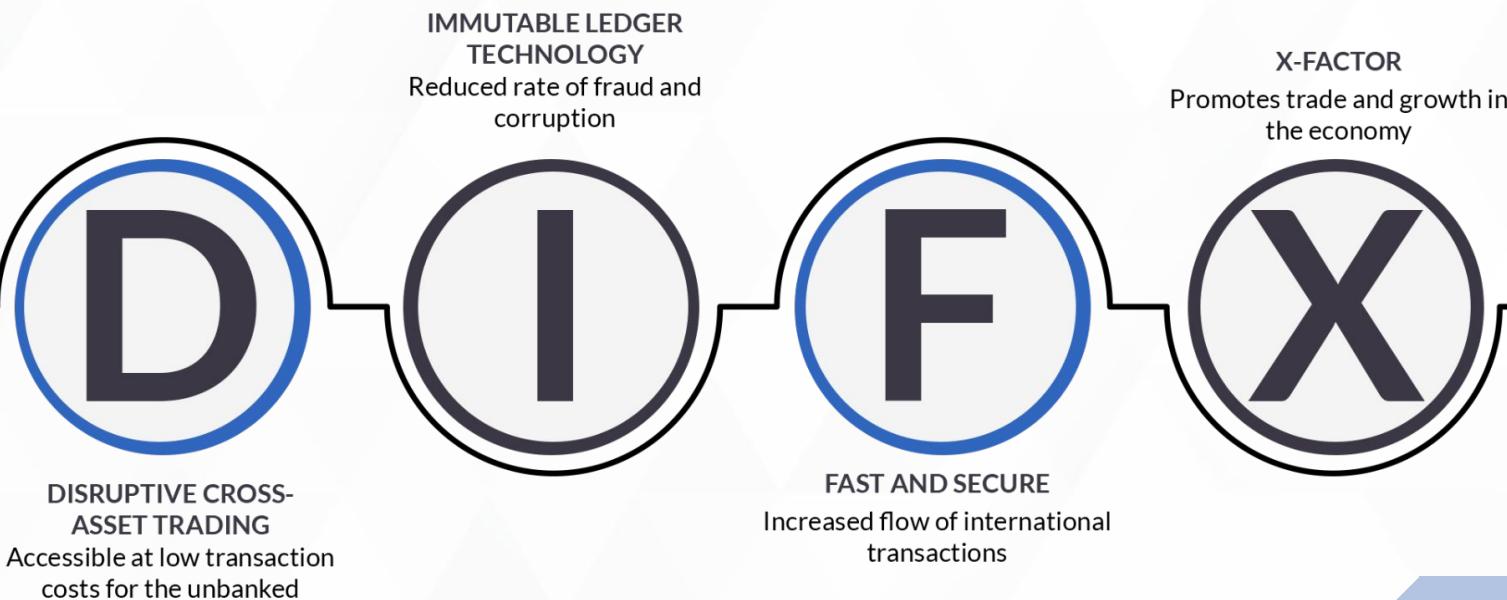

DIFX token provides investors the opportunity for high profit due to the growth stage position.

The DIFX token can be exchanged for major international currencies, stocks /forex, as well as other cryptocurrencies.

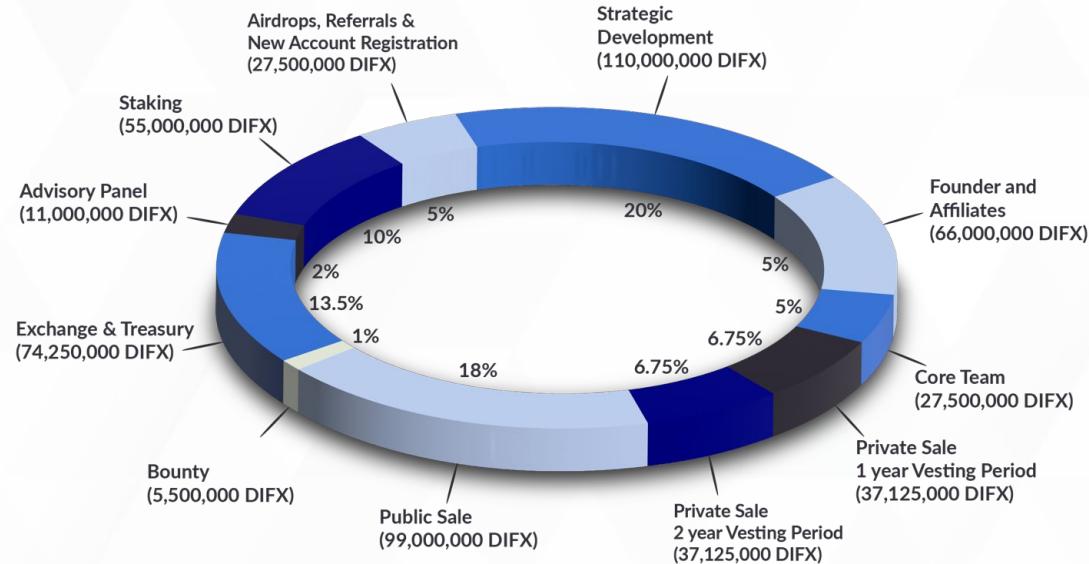

Customer service, real-time rates, faster trade executions, and the availability of highly liquid tradeable pairings.
